## Better Babies Contest Arouses Statewide Interest

The better babies contest still continues to arouse interest all over the state and Fair Secretary Binkler and the members of the Woman's club are realizing that this highly commendable undertaking is already accomplishing much good.

When it is understood that this is not the old time baby show, but a scientific movement to insure better babies and a better race, it cannot fail to arouse interest in the minds of all intelligent persons.

The ladies wish to assure all mothers that the contest will be conducted in a highly sanitary way and that there can be no possible danger of contraction of disease. Each child will first pass through the hands of a competent nurse, who will observe

whether it is in a healthy condition and none but the perfectly healthy child will be allowed to enter.

Each mother will provide her own baby-blanket and may go with her child through the various physicians booths, where she will obtain the most valuable information concerning her child.

The health exhibit and talks by the different physicians should be missed by no one, as they will be of the most practical information in assisting mothers in the care of their little ones, according to modern methods.

The equipment shown, and which is necessary for the proper health of the baby, will be such as mothers of average means may secure and that the poorest may make for themselves.
